KNEX
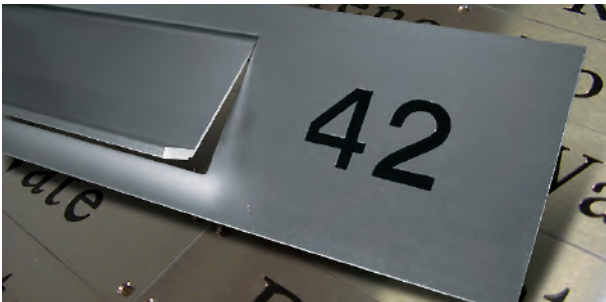

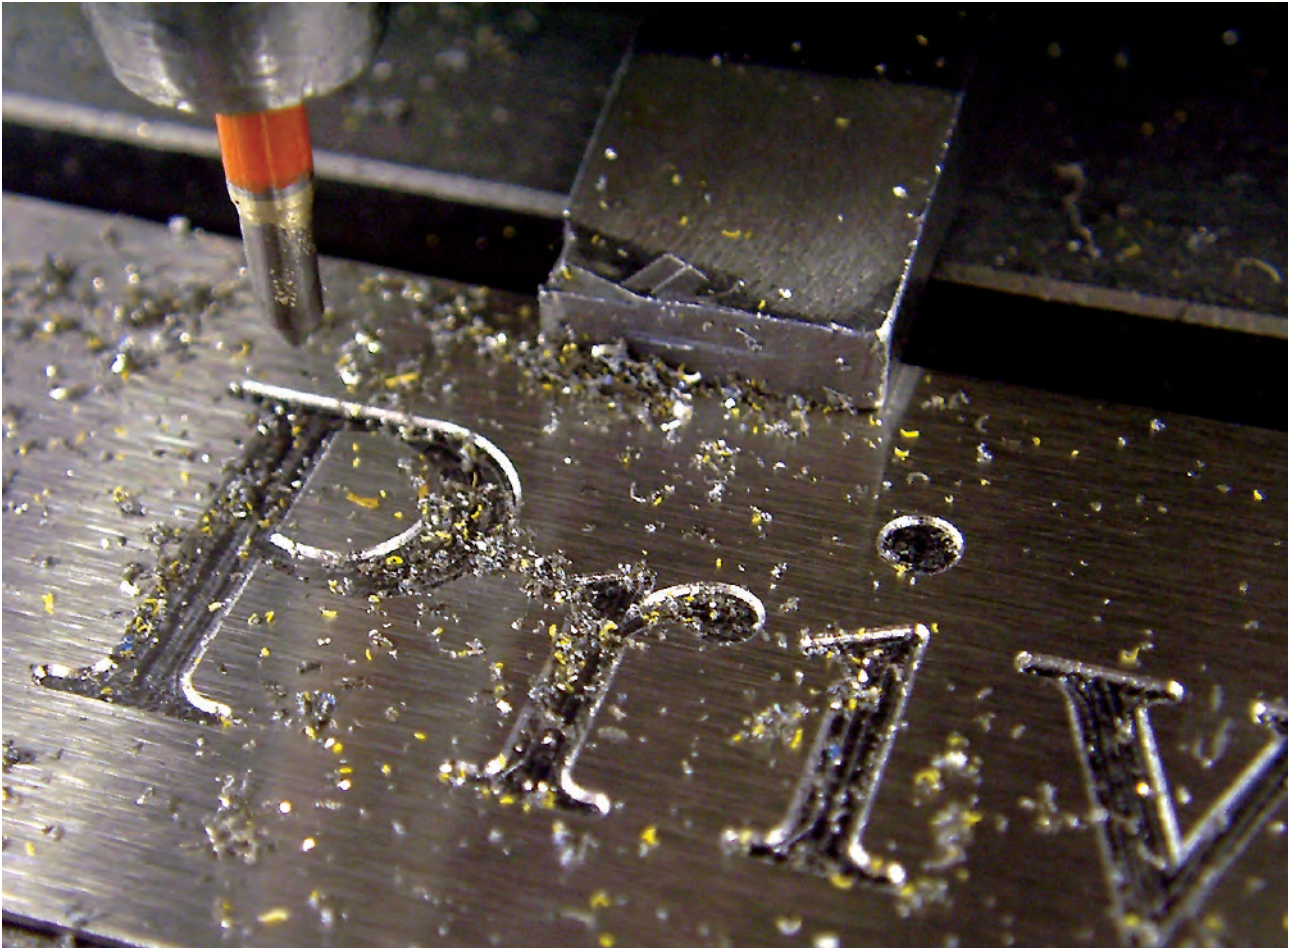

Architechtural Ironmongery Ltd

SIGNAGE

All types of computerised and manual machine engraving is currently available utilising a host of materials including aluminium, brass, stainless steel, perspex, engraving plastic (traffolite) and most other metals and plastics.

Letters, numerals and logos can be engraved onto an array of 'free issue' products such as letterplates, control panels, switches etc. Infill colour can be supplied to match any BS or RAL reference.

Special shapes and cutouts can be produced and for larger production runs, a laser cutting service is also available.

Standard nameplates are priced by the letter and a chart can be found in the price list

Almost any typeface can be engraved and shown overleaf, are a few examples of the most popular used:

GROUP 1 TYPEFACES

GILL SANS   HELVETICA 1 LINE   SINGLE CUT CONDENSED

GROUP 2 TYPEFACES

AVANT GARDE   GILL SANS   RELIEF
BODINI   HELVETICA LIGHT   ROMAN LIGHT
CLARENDON   HELVETICA MEDIUM   ROMAN OUTLINE
Commercial Script   HELVETICA BOLD   TIMES ROMAN
DESDEMONA   HELVETICA OUTLINE   TIMES BOLD
DYNAMO SHADOW   MICROGRAMMA   TRAJAN ROMAN
FUTURA   OPTIMA   UNIVERSE 55
FUTURA MEDIUM   PUMP SOLID   קקרנקי (HEBREW)
GARAMOND   PUMP OUTLINE

Helvetica 1 Line and Helvetica Medium Explained...

Helvetica 1 Line
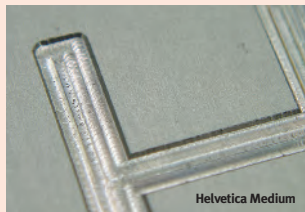

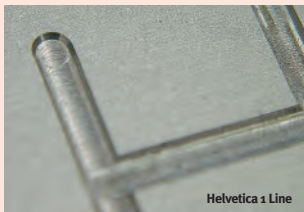

Helvetica Medium

The difference is the stroke of the letter for Helvetica 1 Line is determined by the diameter of the cutter, leaving a rounded end to the letters. For Helvetica Medium, a smaller cutter is used to engrave the outline of the letter and then take-away the middle, hence this takes twice as long.

Handy Hint: *To estimate the length of a nameplate, multiply the height of the letter by the number of letters and spaces required. Don't forget to include a space at each end!*

**Stand-Off signs are 5mm thick, silicon acrylic with face plates to match any door hardware.**

Supplied with stand-off sign supports, silicon acrylic has a light green tint around the polished edges to give a glass appearance. If a door number or name requires changing, only the face plate has to be replaced.

TACTILE & BRAILLE
SIGNS

All of our tactile and braille signs are manufactured with the guidance of the Royal National Institute for the Blind to ensure that they conform to the DDA Regulations Act 1995.

We supply Grade 1 Braille for short word signs or Grade 2 Braille (which is a contracted form) for longer sentence signs.

The system we use enables us to supply tactile and braille signs in any metal finish, such as aluminium, stainless steel or polished brass, as well as any colour plastic. This proves beneficial when there is a need to match existing door furniture.
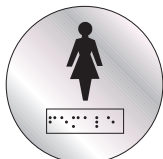

CAN'T FIND WHAT YOU'RE LOOKING FOR?

We can produce almost any sign to your very own specifications.

ECO EXIT BOX RANGE

With an external white painted finish on steel and a choice of screen printed legends, this very shallow exit box model incorporates reliable 8W control gear, but with reduced battery specification to provide a budget option for emergency signage requirements above doors.

	Dimensions	Lamp (Mains)	Lamp (Emergency)	Operating Mode
ECO1	385 x 195 x 80mm	-	1 x 8W	Non-maintained
ECO2	385 x 195 x 80mm	1 x 8W	1 x 8W	Maintained

EUROLUX BULKHEAD RANGE
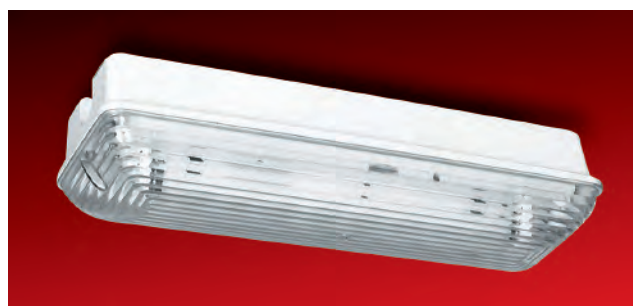

A reliable and stylish range available in 8W rating for most indoor applications and, having a polycarbonate diffuser, can be used outside by fitting the gasket provided for an IP rating.

	Dimensions	Lamp (Mains)	Lamp (Emergency)	Operating Mode
EUR1	380 x 115 x 80mm	1 x 8W	Non-maintained	Non-maintained
EUR2	380 x 115 x 80mm	1 x 8W	1 x 8W	Maintained

When ordering, please quote product code and material required · All signs unless stated are available in either self-adhesive vinyl, 1mm rigid plastic or 0.9mm aluminium · Plastic and aluminium signs are drilled for screw-fixing as standard · Alternative self-adhesive back on request at no extra cost.

STAFF FIRE

GENERAL
BEFORE WE HAVE A FIRE
Ensure YOU know:- the means of escape from the building and the location of the fire equipment.
The location of the fire alarm call points and detectors.
The areas covered by each fire alarm zone.
The location of rooms not protected by the fire detection system.
KEEP:- CORRIDORS CLEAR, STORES LOCKED (AT ALL TIMES) STAIRCASES CLEAR, FIRE DOORS CLOSED.

FIRE DRILL PROCEDURE
The fire drill relies on a quick attendance of the fire brigade. The person in charge must call the fire brigade (999) as soon as the alarm is heard. Find out where the fire is, then start the evacuation procedure.

EVACUATION PROCEDURE
Phase 1 - Remove occupants of the room involved to the corridor of the compartment involved.
Phase 2 - Remove occupants of the compartment to either an adjoining compartment or to the open air.
Phase 3 - Removal of all occupants of all other compartments within the building to the open air.
Due to the numbers of staff on duty, especially at night, and the degree of ambulance of residents, it is envisaged that your immediate responsibility would be to complete PHASE 1 of the evacuation and begin PHASE 2 prior to the arrival of the Fire Service who will then aid to totally evacuate or to partially evacuate, as they require

VINYL GRAPHICS

AND DIGITAL PRINTING

VINYL GRAPHICS

Almost any typeface or symbol can be vinyl cut quickly and economically to produce one-offs or small runs and can be applied to most surfaces with ease.

Letters can be supplied pre-spaced with carrier film ready for customers own application.

Frosted vinyl can be supplied in a variety of designs for application to glass doors and windows to give an acid etched appearance
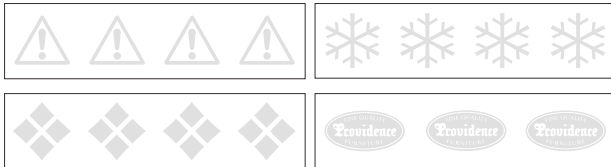

There is a wide range of colours available in both matt and gloss finish. A price per letter chart for standard block letters can be found in our price list.
Specials available by quotation.

DIGITAL PRINTING

A new and rapidly expanding aspect of our business is large (and small) format full colour digital printing which is ideal for exhibitions, signs, banners and even outdoor signage and vehicle graphics.

The Cadet uses hard wearing solvent based inks to print onto vinyl and also incorporates a cutting facility. This makes it perfect for printing labels, stickers and posters.

It can produce large full colour graphics which can be cut to any shape and applied to a vehicle. The ability to produce high resolution prints onto vinyl means the graphics can then be applied to most surfaces, making this printer and the prints it produces extremely versatile.

SCREEN PRINTING

Screen printing is available on most sheet metals, plastics and vinyls. We stock various ink systems in all the standard colours. Any colour can be matched to a BS or RAL number, or to a customers sample. This economical and versatile process can be used to print an array of 'free issue' products providing the surface to be printed is flat, clean and dry.

Sub-surface screen printing is available on various thicknesses and finishes of unsealed anodised aluminium. A very durable label can be produced when printed with the correct inks and sealed, as the print cannot be removed by rubbing or with solvents. This process is ideal for rating plates and labels for use on plant machinery or equipment.

Our in-house artwork department includes a computer-aided design facility with access to thousands of standard logos, symbols and typefaces.
